# RUN AWAY

Life sucks, we may want to run away from it. We suffer from lack of money, suffer from pain of body and feelings, suffer from work, suffer from life. We suffer from the fact that things are never permanent, suffer from always losing something but you can do nothing to help.

So we run away from the dark to color, run away from the world, run away from the self. However, the behavior of our running away is also decided and monitored.

# RUN AWAY

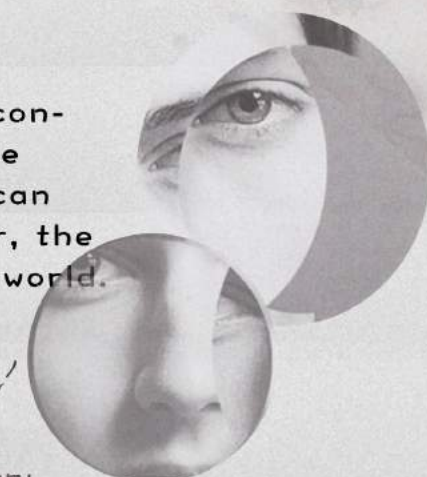

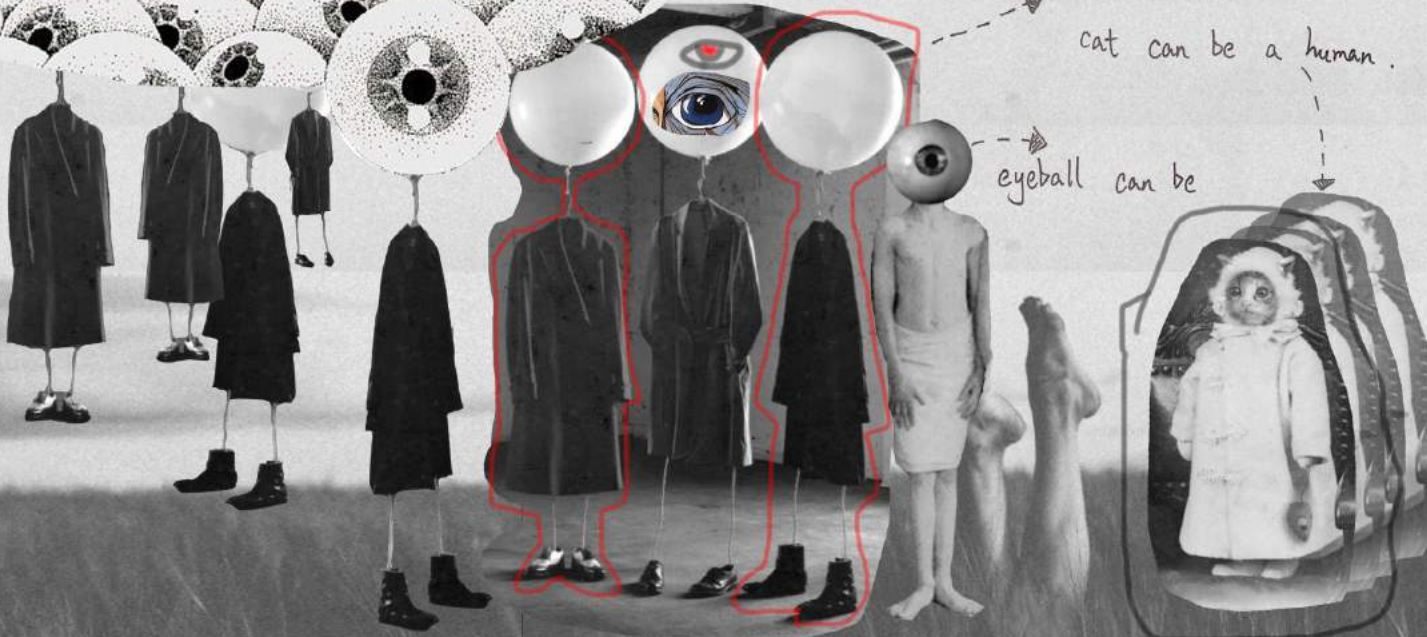

Runaway from the world, we will find that we are controlled and monitored by some object, which is the world. Our cognition decides our behavior, but we can not control what cognition we can absorb. However, the world can. We think we are the only human in the world.

ballon can be  
cat can be a human.

eyeball can be

even pictures  
can be.

But world can make every-  
thing a human being, only if  
the world wants.

# RUN AWAY

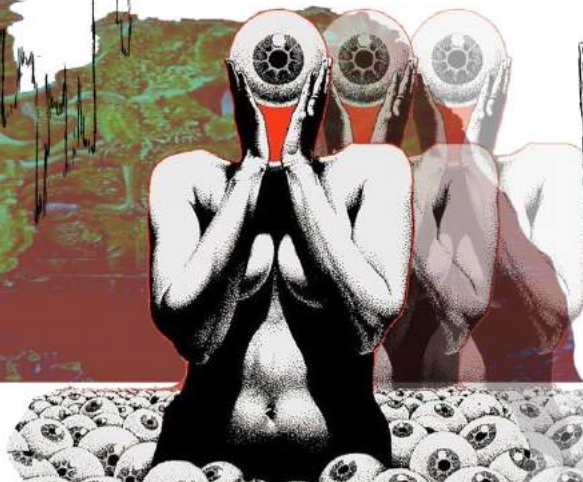

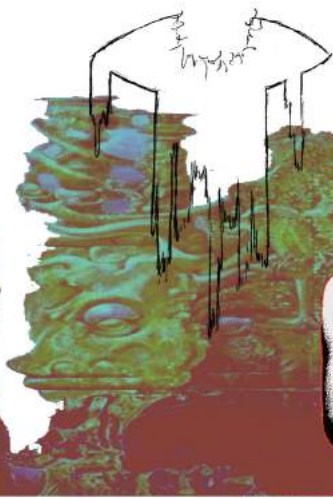

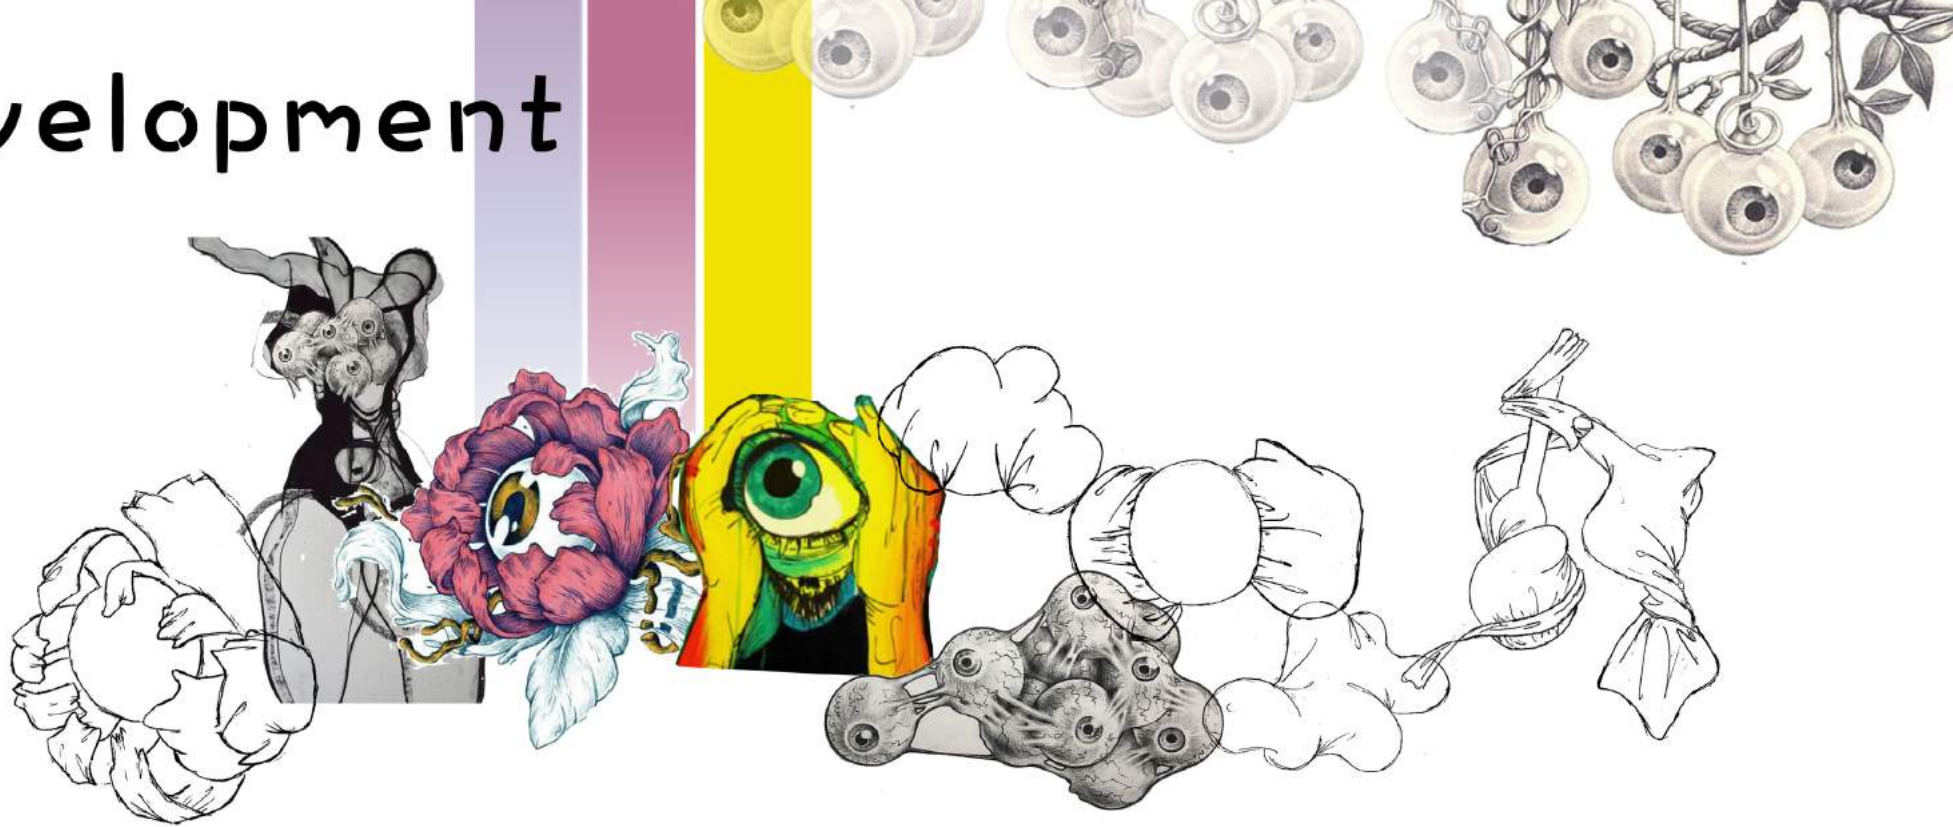

Life is a movie. Our body is the tool that the world control us in this movie. It is the prison that restrict us from doing something we want.

The "seem-right" solution would be to live romantically like flowers and butterflies, which have little life time but living colorfully.

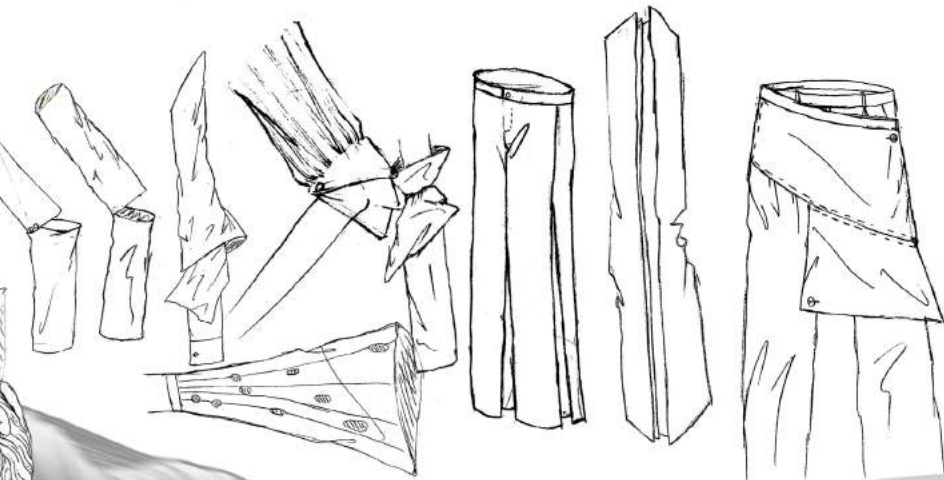

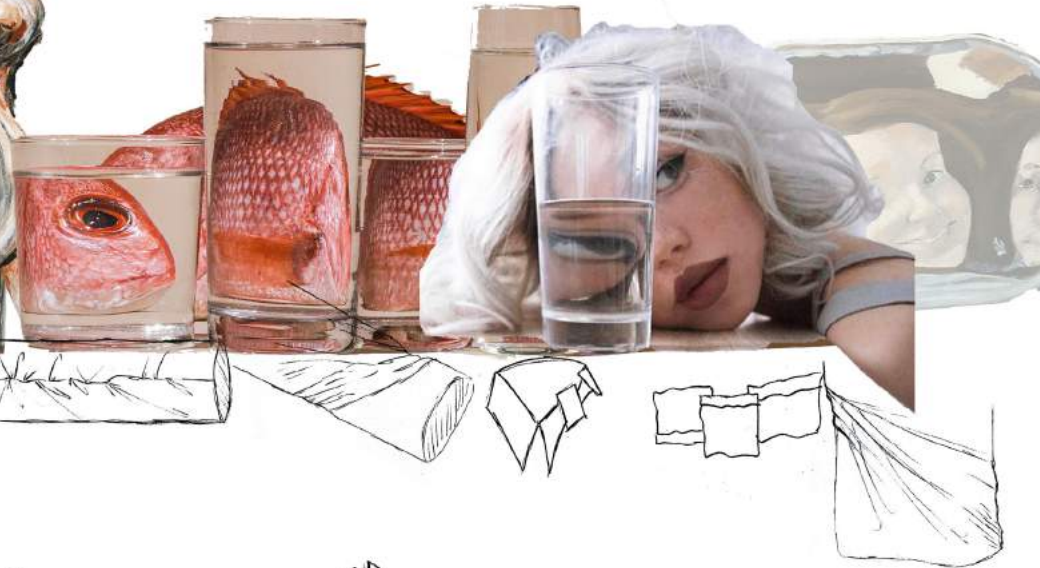

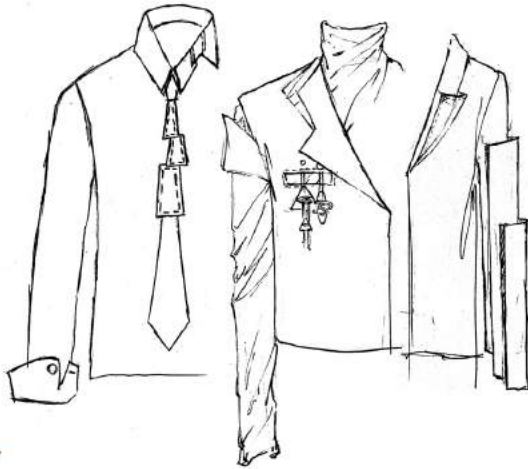

However, we need to understand these are all untouchable. We can see these romance but can't never really touch it.

Once upon time, I heard a song "who are you?" by Saint.  
This song suddenly reminded me of the idea of "untochable romance",  
which is exactly ont of the topic I want to express.  
So I danced with this song and  
developed some pattern with the dance.
